I'm a 19 years old french student from the south of France but currently in Annecy (Haute-Savoie, France) to study computer science.
I love photography, filmmaking and I'm really into any sort of arts (design, paintings, haute-couture, modern arts...).
I decided to move to Annecy for my first two years of studies to discover new horizons, and find new artistic inspirations.

I have always been a creative and I find myself interested in everything around me. To my mind "create" characterizes a whole processus, starting from an idea, going through organization, errors, trials... and finishing to an actual realization of this idea.

Why don't we work together? Go futher down to see why I am the man you need to hire!
Personal Skills

Photoshop

Lightroom

Premiere Pro

Adobe XD

After-Effects

Coding Skills

C

C#

HTML / CSS

PHP

JS

SQL
